WOSB—#WOSB171546  
Texas HUB - #1752554119300

### Clients

University of North Texas  
Trinity Industries  
Rockwall Steel  
The Joule

## Signature Repairs Scope of Work

- Check for tears, rips, exposed scrim or other material defects.
- Clean all flashings and seams to provide smooth contaminant free surface
- As needed, prime all seams and openings
- Seal all open voids with RMI-Flex. Where voids are greater than 1/8" fill with sealant.
- Apply RMI-Flex to encapsulate, seams, and laps at an average thickness of 48 mil.
- In clean straight lines, apply RMI silver topcoat over and extending past repair area.
